OBJECTIVE: *To pursue a challenging career in a dynamic organization that offers extensive opportunities for career development and where my creative initiative ideas and a genuine enthusiasm would allow me to progress.*

PROJECTS

Jan 2025 – Present

File Management System BitKnox, Haly Tower DHA, LHR

File Flow is a robust file management system designed to streamline the handling, tracking, and processing of file-related requests within an organization. The system allows users to initiate file requests, generate and scan unique barcodes for physical files, and monitor the real-time status of requests through a centralized interface. It supports automated workflow routing based on department or user roles, ensuring secure and efficient file handling. Real-time notifications via Web Sockets keep users informed of updates, approvals, or issues. The back-end is API-driven, enabling flexible integration with other systems.

As the team member, I led and collaborated on the project from initial planning and architecture to implementation and deployment.

Tools**:**

- Laravel10x, PHP, Oracle, ReactJS, Redux, WebSockets (Laravel Echo), RESTful APIs

Oct 2023 – Jan 2025

Proctor8   TGI (Tabs Group International), Haly Tower DHA, LHR

Proctor 8 is a comprehensive test proctoring system comprising the Proctor's dashboard, scheduling exams for customers, and a desktop application for exam proctoring. The proctoring process involves features such as face detection and monitoring, system scans to check for background processes and terminate them, customer identity verification, and more. Additionally, the system includes a payment method for seamless transaction processing. As the Team member, I oversaw and worked with my team on project from conception to completion.

Tools:

- Laravel8x, PHP, SQL, Vuetify3, Laravel Blade, Bootstrap, VueJs3, Socket.io, ElectronJs

June 2023 – Sep 2023
